## IS THIS HAPPENING TO YOU?

Deteriorating Skin	Drowsiness After Meals	Swollen And Putting On Weight
Bloated Abdomen And Constipation	Bloated Stomach And Nausea	Lethargy

You may be taking health supplements and doing exercise, but the body still feels weak. This is because of internal problems!

### Enzymes Deficiency Might Be More Fatal Than Lifestyle Diseases And It Makes You Gain Weight

All living things on Earth need enzymes to sustain life. Enzyme depletion in the body can be a matter of life and death. The human lifespan is determined by the total amount of enzymes in the human body.

Enzymes are life elements that maintain thousands of body functions: in addition to digestion, they also promote metabolism and tissue repair.

Enzymes deficiency leads to impaired body functions, low metabolism, and accumulation of toxins and fats.

## WHY MUST WE TAKE ENZYME SUPPLEMENTS?

### The Body Produces Limited Enzymes

The amount of enzymes at age 30 is only half of that in childhood

Environmental pollution

Drug abuse

Diseases

Pressure of life

### External factors consume a large amount of enzymes

If it is not possible to take fresh fruits and (raw) vegetables daily for enzyme supplementation. Thus we can only use the most natural plant energy to replenish

## UNLIMITED Sources
